FOR IMMEDIATE RELEASE

World Teleport Association Names XipLink's XHO 2011 Teleport Technology of the Year

Single-sided optimization technology wins top honor

March 15, 2011 – Montréal, QC, Today XipLink, the technology leader in wireless optimization announced that the company's XipLink Hub Optimizations (XHO) product has been named as the Teleport Technology of the Year by the World Teleport Association. The award was announced at the annual WTA awards luncheon at the Satellite 2011 show currently running at the D.C. Convention Center through Thursday, March 17th.

The XipLink XHO solution provides Teleport and Network Operators immediate bandwidth savings on outbound web traffic as well as providing sophisticated class-based queuing for IP traffic management purposes and split PEP operation to optimize TCP sessions on both the outbound satellite path and the Internet backhaul access. The innovations include simplicity of deployment as a hub side only device and the ability to selectively "bracket" remote connections for full two-way TCP, UDP and web optimizations at a capital efficient price.

"XipLink is grateful to the World Teleport Association for selecting XHO as the technology of the year," said Jack Waters, XipLink CEO. "We are honored to be recognized for the impact XHO has made on the industry. More specifically, we are extremely pleased to be able to provide Teleport or Network Operators a higher level of service thus becoming more competitive with wire-line technologies. Our customers, employees and advisors deserve the highest accolades for translating market requirements into a world class product."

The 2011 Luncheon and Awards Ceremony hosted many of the world's leading teleport operators and previous winners of WTA's Teleport Awards for Excellence. A senior representative from SES, Chris Schram, gave the Host's Welcome and presented the awards to the recipients, with WTA Director of Development Louis A. Zacharilla announcing the winners.

Commenting on the 2011 Awards, WTA's Director of Development Louis Zacharilla noted that, "Innovation and dedication to service have long been motivating drivers for the teleport industry. Each of the finalists in the 2011 Teleport Awards for Excellence has gone above and beyond a daily commitment to quality operations. As a group they exemplify the drive that has made this industry successful, as well as a community with a dedication to helping others."

About XipLink, Inc.

XipLink is the technology leader in wireless optimization using standards based SCPS protocol acceleration, streaming data compression and Internet optimizations to deliver the maximum capacity over stressed wireless communication links. XipLink is a privately owned company with Headquarters in Montreal, Quebec and Sales and Marketing offices in Washington, DC. For more information visit www.xiplink.com or email xiplink@xiplink.com

About World Teleport Association

Since 1985, the World Teleport Association has focused on improving the business of satellite communications from the ground up. At the core of its membership are the world's most innovative operators of teleports, from independents to multinationals, niche service providers to global carriers. WTA is dedicated to advocating for the interests of teleport operators in the global telecommunications market and promoting excellence in teleport business practice, technology and operations.
